

GENIEMAT[®] FAS

FLOORING ADHESIVE SYSTEM

PRODUCT SPECIFICATION

PRODUCT NAME: GenieMat FAS

GenieMat FAS is a single component 100% solids, cross-linking, polymer-based adhesive formulated for interior installation of all thicknesses of solid/engineered wood, pre-finished and unfinished wood, bamboo and dry-back wood parquet flooring. **GenieMat FAS** also has superior concrete moisture inhibition capability (becoming waterproof when fully cured) and provides isolation for cracks up to 1/8" wide.

DESCRIPTION: **GenieMat FAS** is solvent and isocyanate free, has negligible (0.5 g/L) VOC content, contains no hazardous chemicals as per OSHA Regulation CFR 1910.1200 and is a nonflammable, low odor adhesive that meets all federal, state and local government indoor air quality regulations.

This specially formulated adhesive has good early strength buildup for immediate grab and gradually builds into a tenacious but resilient bond as the chemicals in the adhesive cross-link.

APPLICATION: **GenieMat FAS** is used for bonding **GenieMat** sound control underlayments to various subfloors/substrates, and for bonding specified wood finish floors to GenieMat[™] sound control underlayments.

INSTALLATION METHOD: Immediate wet set installation. 60 minute working time. Use a 100 lb roller and allow 16 hours before light traffic, 24 hours before heavy traffic and 72 hours before sanding.

BASE: Polymer-Resin Blend

APPEARANCE: Off white, smooth, easy-to-spread mastic

WORKING TIME: Approximately 60 minutes, depending on temperature and humidity

SHELF LIFE: 1 year in unopened container at 21°C (70°F)
